FOREWORD

This publication has been prepared for those who administer the interschool athletic programs for middle level schools. On January 21, 1975, the IHSAA authorized the appointment of a committee to study and prepare guidelines for athletics in middle level schools. Many member schools had asked for guidance in the direction of a program adapted to the abilities of students at this level of competition. An understanding of the physiological and emotional development of early adolescents, the need for providing safety precautions, and the importance of protecting the best interests of students, prompted this request. The lack of specific limitations in number of contests, age of participants, etc., often resulted in abuses, inequities, inconsistencies and unfair competition. This Committee met frequently; conducted its study and received cooperation of a high percentage of school administrators. The following guidelines represent the judgment of the middle level representatives attending the State Athletic Administrators Association Conference in Indianapolis, and the Study Committee comprised of middle level representatives from each of the state's six districts.

MIDDLE LEVEL SCHOOL GUIDELINES

PREAMBLE

The Indiana High School Athletic Association and the Indiana Interscholastic Athletic Administrators Association do not govern middle level schools, but recommend that they follow these rules within the guidelines set by the individual school district, principals' association, district athletic association, or school's athletic conference. Middle schools shall comply with Title IX.

PURPOSE

The purpose of these guidelines shall be to encourage, unify and give direction to wholesome amateur interschool athletic competition between middle level grade students. All such interschool athletic competition coming under the suggested guidelines shall be subservient to and complementary to the academic or curricular functions of the schools, which are their primary purposes. To assure that the program of interschool athletic competition remains steadfast to the principles of wholesome amateur athletics and subservient to its primary academic or curricular functions of education of the middle level school, schools should cooperate with agencies vitally concerned with the health and educational welfare of school students; furnish protection against exploitation of schools or their students; determine guidelines for qualifications of individual contestants, coaches and officials; and provide written communications to establish guideline standards for eligibility, competition and sportsmanship.
